

Police Department Headquarters & Department of Public Works – Hudson, MA

Samiotes worked with Kaestle Boos Associates to complete this \$15,000,000 Police Headquarters and Department of Public Works combined building for the Town of Hudson. The new 26,000-square-foot building was designed for the site adjacent to the Hudson Fire Headquarters and next to the Town's transfer center, creating a municipal campus with 16-acres total.

Samiotes provided civil engineering, environmental permitting, and land surveying services for the project. Our responsibilities included soil testing and Town of Hudson Conservation Commission and Planning Board approval. Additionally, Samiotes worked with the General Contractor to provide construction layout services and support for the NPDES SWPPP Construction General Permit.
