

## Kincaide Park – Quincy, MA

Kincaide Park is a historic property in Quincy, ideally located in the center of a neighborhood and school zone. Located within a **10-year floodplain**, flooding in the past was common, and the site was not being utilized effectively. The residents were heavily involved in the design process to create a space with improved stormwater management, recreational zones, and a focus on the community. The renovations included a new turf field, basketball courts, a track, and a splash pad for children, along with other elements to use for exercise. A walking path circles the parks perimeter, offering movement around the site and views from all angles.

Samiotes completed the civil engineering design for the updates and renovations to the park. To correct the flooding, the civil design incorporates topographic strategies that maximize infiltration and storm water capture through a network of rain gardens, landforms, and open spaces.

**Landscape Architect** | Bishop Land Design, LLC

**Completion Date** | 2020

**Construction Cost** | \$6,000,000

**Services** | Civil Engineering, Land Surveying, Environmental Permitting

**Awards & Recognitions** | BSLA Award, Special Recognition | Champions for Community Voice
